network how to deploy Cisco IOS VTI-based point-to-point IPsec VPNs, and point-to-point IPsec VPN on the Cisco ASA and Cisco FirePower Describe common TCP/IP, network application, and endpoint NGFW attacks Describe and deploy Cisco secure remote access connectivity

AWS Site-to-Site VPN

The VPN tunnel comes up when traffic is generated from your side of the Site-to-Site VPN connection The virtual private gateway is not the initiator; your customer gateway must initiate the tunnels If your Site-to-Site VPN connection experiences a period of idle time (usually 10 seconds, depending on your configuration), the tunnel may go down
